

Fidelity Webinar |

Getting Started with Investing

Tuesday 16th June at 10.00am

This webinar is aimed at those who are new to investing. We'll explore the importance of setting financial goals, why there is a difference between saving and investing, and why they each have their place.

If investing feels like a network of B roads to navigate without a map, this session will show you the map and straighten the roads. To get things started, we'll also look at the five key questions that'll help you decide whether investing is right for you.
